## **2007 Annual Report**

Paul W. Ribitzki, Recorder

The information contained in this report is taken from the records of the Tulsa Audubon Society, Tulsa, Oklahoma, for the calendar year 2007. It is a summary of the first and last dates reported, number of individuals per season, size of flocks, number of field reports, and total number of individuals. The species are divided into three reporting periods: Spring Migrants, Permanent or Summer Residents, and Fall Migrants. This report also offers a brief comparison of the 2006 and 2007 records. The reporting area includes all of Tulsa County, up to five miles into the bordering counties of Creek, Okmulgee, Osage, Pawnee, Rogers, Wagoner, and Washington, and Lake Keystone.

There were 274 species that totaled 163,518 individuals in 3571 field reports in 2007. This eclipsed the number of 254 species that totaled 46,465 individuals in 2091 field reports in 2006.

There were 14 species reported in 2006 that were not recorded in 2007 and 33 species reported in 2007 that were not seen in 2006.
